📄 PROFILE

Computer Science student at UEM Jaipur with strong expertise in React-based frontend development. Experienced in developing multiple projects, including Kissanahelper, a platform that provides guidance to farmers on soil, seeds, weather, and best farming practices. Core strengths include coding, creating user-friendly web applications, and delivering effective, impactful solutions.

🎓 EDUCATION

University Of Engineering & Management B.tech CSE(AIML)	CGPA - 7.76	08/2022 – present Jaipur, India
Joypur High School (HS) 12th Standard	Score - 90.2%	07/2020 – 03/2022 Joypur, India
Joypur High School (HS) 10th Standard	Score - 83%	06/2019 – 03/2020 Joypur, India

🧠 SKILLS

Programming Language

- Java, JavaScript, Python, ReactJS, HTML, CSS, Tailwind CSS, Node JS, Express.JS

Database

- MongoDB, SQL

UI/UX Design

- Figma, Canva

Coding Platform

- Git, GitHub, VS Code

Cloud Platform

- Firebase

🏢 PROFESSIONAL EXPERIENCE

HONNOIX INDIA 🔗 Trainee	11/2024 – 03/2025 Gurgaon, India
• Finished 16-week semester-long course on 6G technology, including intelligent surfaces and THz communications. • Analyzed 3+ potential real world applications of next-gen wireless systems in IoT and smart infrastructure.	
Intern, EduSkills & AWS Academy 🔗 EduSkills & AWS Academy	02/2025 – 03/2025 Jaipur, Rajasthan
• Engaged in a virtual internship with AWS Academy focused on AI/ML that included hands on labs and project based learning. • Completed 5+ cloud based AI/ML exercises using AWS tools.	

📁 PROJECTS

Kissan Helper 🔗 • React.js , Tailwind CSS • Created a digital platform that is connect all of the agricultural needs for Indian farmers. • Added capabilities that included soil testing reports, crop selection recommendations,provided treatment suggestions and live updates on news. • Implemented a leaf disease detection feature with 85%+ accuracy through the use of image classification.	03/2025 – present
Leaf Disease Detection 🔗 • Python, TensorFlow / Keras, Matplotlib, Seaborn (for visualization), Pandas • Created a CNN model with 92% training accuracy for classifying plant diseases across 15+ categories. • Augmented with an additional 3,000+ images to ensure robust learning and avoidance of overfitting. • The model evaluation achieved 90%+ validation accuracy which ensured that the model is generalizing to new sample model.	02/2025 – present
GitHub Profile Analyzer 🔗 • React.js, Tailwind CSS, GitHub API • Built a web platform to analyze GitHub profiles, providing insights on repositories, languages, and activity. • Implemented data visualization for top languages, most starred repositories, and contribution statistics using charts. • Designed an interactive and responsive UI with Tailwind CSS for better user experience.	07/2025 – 08/2025

🏆 AWARDS

Ace Hack 4.0 Hackathon Participant	03/2025
Grasp the 16th position over all 500+ participants team. It was arranged by ACM society and University of Engineering and Management, Jaipur.
